

What is claimed is:

1. A business information system comprising:

an organization definition information storing unit for
storing organization definition information for defining an
5 organization;

a contents storing unit for storing contents consisting
of either a procedure or information provided for users or
both of them;

a customizing information storing unit for storing in set,
10 as customizing information, a customizing condition set as
information customizing an utilization environment by use of
arbitrary organization definition information stored in said
organization definition information storing unit, and
information for indicating contents to be provided as
15 utilization environment in a case where the customizing
condition is established;

an organization definition information registering means
for storing input organization definition information in said
organization definition information storing unit;

20 a customizing information registering means for storing
in set, as customizing information, input customizing
condition and information indicating contents to be provided
in a case where the customizing condition is established, in
said customizing information storing unit; and

25 a personal environment constructing means for acquiring
the customizing information from said customizing information

storing unit, for judging whether or not the customizing condition is established with regard to each user by utilizing the organization definition information stored in said organization definition information storing unit, and for
5 acquiring the contents stored in set together with the customizing condition from said contents storing unit in a case where the customizing condition is established, thereby adding the acquired contents to a personal environment of the user.

10

2. The business information system according to claim 1, wherein said organization definition information comprises at least one of information representing organization hierarchy, information representing partial organization, information
15 representing distribution of personnel, and information relative to a job of each of individuals.

3. The business information system according to claim 2, wherein said information relative to the job of each of the
20 individuals comprises information representing at least one of an employee identification number, a name, an occupational position, a covering job, a function, a duty, a knowledge, an experience, and a location.

25 4. The business information system according to claim 1, wherein said organization definition information storing unit

stores authentication information indicating that each of individuals is a true user of the business information system, and wherein at least one of said organization definition information registering means, said customizing information registering means and said personal environment constructing means executes a processing only when a user is a true user of the business information system, on a basis of the input authentication information of the user.

10 5. The business information system according to claim 2, wherein said organization definition information storing unit stores authentication information indicating that each of individuals is a true user of the business information system, and wherein at least one of said organization definition
15 information registering means, said customizing information registering means and said personal environment constructing means executes a processing only when a user is a true user of the business information system, on a basis of the input authentication information of the user.

20

 6. The business information system according to claim 3, wherein said organization definition information storing unit stores authentication information indicating that each of individuals is a true user of the business information system,
25 and wherein at least one of said organization definition information registering means, said customizing information

registering means and said personal environment constructing means executes a processing only when a user is a true user of the business information system, on a basis of the input authentication information of the user.

5

7. The business information system according to claim 1, wherein said customizing condition is capable of being defined by a complex condition, which is a combination of a plurality of conditions.

10

8. The business information system according to claim 2, wherein said customizing condition is capable of being defined by a complex condition, which is a combination of a plurality of conditions.

15

9. The business information system according to claim 3, wherein said customizing condition is capable of being defined by a complex condition, which is a combination of a plurality of conditions.

20

10. The business information system according to claim 4, wherein said customizing condition is capable of being defined by a complex condition, which is a combination of a plurality of conditions.

25

11. The business information system according to claim 5,

wherein said customizing condition is capable of being defined by a complex condition, which is a combination of a plurality of conditions.

5 12. The business information system according to claim 6, wherein said customizing condition is capable of being defined by a complex condition, which is a combination of a plurality of conditions.

10 13. A method of managing business information by use of an organization definition information storing unit for storing an organization definition for defining an organization,

15 a contents storing unit for storing contents consisting of either a procedure or information provided to users or both of them, and

20 a customizing information storing unit for storing in set, as customizing information, a customizing condition set as information customizing an utilization environment by using arbitrary organization definition information stored in said organization definition information storing unit, and information for indicating contents to be provided as utilization environment in a case where the customizing condition is established, comprising:

25 an organization definition information registering step for storing input organization definition information in said

organization definition information storing unit;

a customizing information registering step for storing in
set, as the customizing information, input customizing
condition and information indicating contents to be provided
5 in a case where the customizing condition is established, in
said customizing information storing unit; and

a personal environment constructing step for acquiring the
customizing information from said customizing information
storing unit, for judging whether or not the customizing
10 condition is established with regard to each user by a
utilization of the organization definition information stored
in said organization definition information storing unit, and
for acquiring the contents stored in set together with the
customizing condition from said contents storing unit in a
15 case where the customizing condition is established, thereby
adding the acquired contents to a personal environment of the
user.
